

SELECTION FACTOR

Contract award shall be limited to instrument Offerors that can demonstrate prime contractor responsibility on a minimum of two successful earth-imaging space instrument developments, as an aerospace company. Each instrument must have been worth a minimum of \$10,000,000. Past performance of bidders will be evaluated to assess the bidder's ability to produce instruments of the scope and complexity of land imaging instruments to satisfy stated requirements.

The Offeror shall provide information verifying that they have been the prime contractor on a minimum of two successful earth-imaging instrument developments. To be successful, the instrument development shall include, at a minimum, instrument design, build, test and successful on-orbit checkout. Any Offeror who has not successfully performed and been directly responsible as a prime contractor for all of the previously mentioned tasks for each of the two instrument developments shall not be considered a qualified contractor.

The Offeror shall provide information for each of these successful instrument developments. Submissions shall be 10 pages or less. The Offeror shall include the following information for each of these developments:

- a. Customer's name, address, email address and telephone number of both the lead contractual and technical personnel, (please verify the telephone numbers provided are current and correct).
- b. Mission name or designation, contract number, type, and total original and present or final contract value.
- c. Date of contract, period of performance, launch date and on-orbit checkout date.
- d. A summary technical description of the instruments and rationale for why they are similar in scope, complexity and performance to stated requirements.
